

THE AIIMI INSIGHT ENGINE LEGACY DECOMMISSIONING

LEGACY DECOMMISSIONING, ENHANCED BY AI.

MAINTAINING LEGACY APPLICATIONS CAN CONSUME OVER 75% OF YOUR ORGANISATION'S IT BUDGET. LEGACY SYSTEMS AND THE DATA STORED THERE ALSO POSE SIGNIFICANT SECURITY RISKS.

Our AI and Machine Learning-enabled legacy migration solution makes it easy to cut ties with costly legacy systems, while adding value to your business-critical legacy data and empowering you to mitigate risk through enrichment. Your legacy data is moved to a scalable cloud platform, easily accessed and discovered using our purpose-built search UI. All data is stored in industry-standard file formats for easy extraction, and you can interconnect your legacy data with current data. By bringing together your entire data picture, it also helps ready your organisation to operationalise AI. Plus, our solution is yours to use again and again.

CONNECT.

Using its open connector API, the Aiimi Insight Engine can connect to any systems storing legacy file information – from cloud BLOB storage to your data lakes or file shares.

ENRICH.

AI automatically enriches information, helping you derive new value from your legacy data – and reduce risk by pinpointing sensitive or high-risk data.

NAVIGATE.

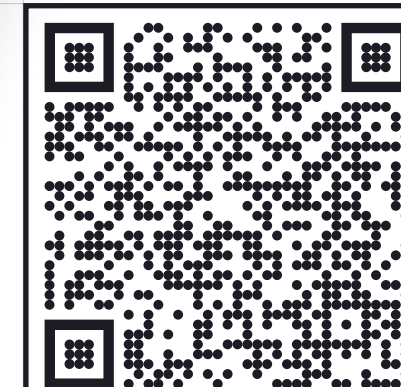

Put your legacy data straight back to work with our user-friendly data discovery tools. Your teams can search, navigate, and display enriched legacy data with ease.

WHAT YOU GET.

- ▶ **OPEN CONNECTOR API** ensures no legacy data is left behind, with comprehensive decommissioning for data and documents (including CSV, XML, and JSON formats).
- ▶ **OUR TEAM OF EXPERTS** help you carry out ETL from legacy applications to decommission any line-of-business system.
- ▶ **AUTO-ENRICHMENT POWERED BY AI** builds value into the process by giving you new insights into your data and helping to ready your organisation for AI adoption.
- ▶ **REDUCED LEGACY MAINTENANCE COSTS** deliver long-term value, as you re-use our solution whenever you want to decommission another system.
- ▶ **USER-FRIENDLY AIIMI INSIGHT ENGINE** enables your teams to search, navigate, and display legacy data with ease.
- ▶ **LEGACY DATA RISK MANAGEMENT** is made simple with AI-powered tools to pinpoint and protect high-risk or sensitive data.

HOW IT WORKS.
